- Delodajalec nudi pomoč pri iskanju nastanitve.

Kontaktna oseba delodajalca za dodatne informacije in prijave:

Na delovno mesto se lahko prijavite preko [povezave](#) ali pa pošljite vlogo in življenjepis v angleškem ali nemškem jeziku na eNaslov: bewerbungen@ipgphotonics.com.

Kontaktna oseba Zavoda RS za zaposlovanje je svetovalka EURES, Katarina Kavčič 059695727 (ponedeljek, četrtek, petek) ali 01 330 81 96 (torek, sredo), e-pošta: Katarina.Kavcic@ess.gov.si

10000-1183105607-S - Elektroonstrukteur EPLAN / SPS-Programmierer (m/w/d)

IPG Photonics is the world's leading manufacturer of high-power fiber lasers and amplifiers used primarily in materials processing and a wide variety of other applications. Our mission is to make fiber laser technology the tool of choice in mass production. As an international company, we have been developing and producing sophisticated high-tech solutions for more than 25 years with over 6,000 employees worldwide.

For our Laser Automation department in Allershausen, Bavaria, we are looking for a qualified Electronics Constructor EPLAN / SPS Programmer (all genders)

Your Tasks:

- Planning and creation of electrical circuit diagrams in EPLAN
- Project planning, design and programming of programmable logic controllers (PLC)
- Elaboration of circuit and cable plans, terminal lists and parts lists as well as documentation
- Review of the proper implementation taking into account all relevant norms, guidelines and safety standards
- Clarification of technical matters with the development and project teams
- Processing of order-specific adaptations and design changes

Your Profile:

- Degree in electrical engineering or comparable
- Professional experience in electrical engineering
- Confident in handling EPLAN P8
- Experience with SPS programming is an advantage
- Very good German and good English skills
- Initiative, independence and a strong team orientation

This task will inspire you if you want to work in a dynamic, fast-growing company and want to get involved with your own initiative.

Please submit your written job application, including a cover letter and CV, your key qualifications, job references and earliest possible start date. Please submit your application preferably to our career website or to bewerbungen@ipgphotonics.com.
